

JAGDEEP KUMAR MAHTO

Email: jagdeepa1047@gmail.com | Phone: 7250147174 | Location: Bengaluru, Karnataka, India | LinkedIn: linkedin.com/in/jagdeep-kumar-mahto

Date of Birth: 17/01/2003

PROFESSIONAL SUMMARY

Software and Data Engineer with hands-on experience in Python, Java, C/C++, and SQL across application development and ETL pipeline development using Talend, DBT, Matillion, and Snowflake. Skilled in building cross-platform applications, designing data pipelines and schemas, and delivering analytics-ready data using Power BI. Adaptable and detail-oriented, with a track record of quickly learning new tools and technologies, and committed to writing maintainable, well-tested code.

KEY SKILLS

- Programming: Python, Java, C/C++, SQL
- Data Analysis: Data cleaning, validation and reconciliation, schema building, statistical trend analysis
- ETL and Data Warehousing: Talend, DBT, Matillion, Snowflake, batch ETL/ELT pipeline design
- Visualization and Reporting: Power BI, Tableau, Qlik, automated dashboards
- AI and Machine Learning: YOLO, OpenCV, Roboflow, image dataset annotation and validation
- Cloud and Databases: GCP, Azure, MySQL, Oracle, Excel, Google Sheets

PROFESSIONAL EXPERIENCE

Project Engineer / Software Developer, Cadmaxx Solutions Pvt Ltd

Client: LRDE, DRDO, Bengaluru | April 2026 to Present

- Develop and maintain applications in C, C++, and Qt for cross-platform solutions
- Apply object-oriented programming, modular design, and structured testing for maintainable codebases

Trainee, Data Analytics & Intelligence, Wipro Limited

Bangalore, India | December 2024 to December 2025

- Performed data engineering work: designed and optimized batch ETL/ELT pipelines (Talend, DBT, Matillion) to ingest structured datasets into Snowflake for analytics and reporting
- Wrote SQL-based transformations to populate fact and dimension tables; applied Slowly Changing Dimension (SCD Type 1 and 2) logic for historical data accuracy
- Performed data validation, reconciliation, and root-cause analysis to ensure data quality and SLA adherence

Intern, Centre for Airborne Systems (CABS), DRDO

Bengaluru, Karnataka | January 2024 to February 2024

- Built a real-time object and face detection application using YOLO, OpenCV, and Python
- Annotated and pre-processed image datasets in Roboflow, performing quality checks to improve detection accuracy

PROJECTS

Sales Analytics Dashboard Pipeline (SQL, Python, Power BI)

- Built a data pipeline to ingest sales data from CSV and relational sources; cleaned, transformed, and modeled it into reporting-friendly tables; performed exploratory data analysis and visualized insights in Power BI

Hospital Data ETL Pipeline (Talend, Snowflake, SQL)

July 2025 to October 2025

- Designed end-to-end ETL pipelines to ingest multi-format healthcare data into a Snowflake data warehouse, with job logging and pipeline monitoring for troubleshooting

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology

B P Poddar Institute of Management and Technology, Kolkata, West Bengal | October 2020 to July 2024 | CGPA: 7.98 out of 10

CERTIFICATIONS

- SnowPro Associate - Platform Certification, Snowflake; Databricks Certified Data Engineer Associate (2025-2027)
- Professional Data Engineer Certification, Google Cloud; Associate Cloud Engineer Certification, Google Cloud (2025-2028)
- Microsoft Certified: Power BI Data Analyst Associate, Azure Data Fundamentals, Azure Fundamentals; dbt Fundamentals, dbt Labs (2025)
- Qlik Sense Business Analyst Certification (2026-2028); Qlik Replicate Certification; Qlik Talend Core Data Integration Certified Developer (2025-2027)
- Matillion Academy certifications: Python in Matillion ETL, Semi-Structured Data, Git Integration, ETL Best Practices, Building a Data Warehouse (2025)
